

Organizational models for global public policy and oversight

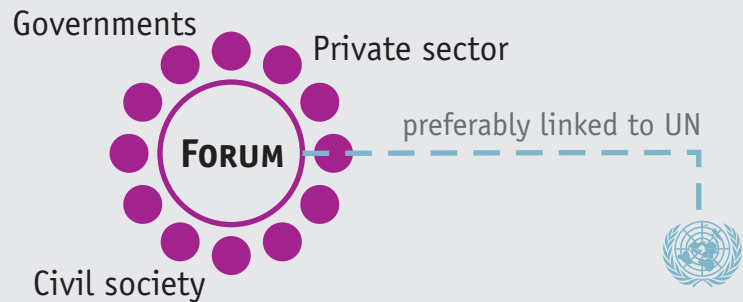

Version 0.2 (2005-07-15)

Graphics: Alexander Svensson <alexander@svensson.de>

Caveat! This is an INOFFICIAL attempt at visualizing the recommendations mentioned in the Working Group on Internet Governance (WGIG) final report, section V.A.1. The four models are only described very briefly in the report, so it may well be that the graphics do not match the WGIG members' understanding of the models.

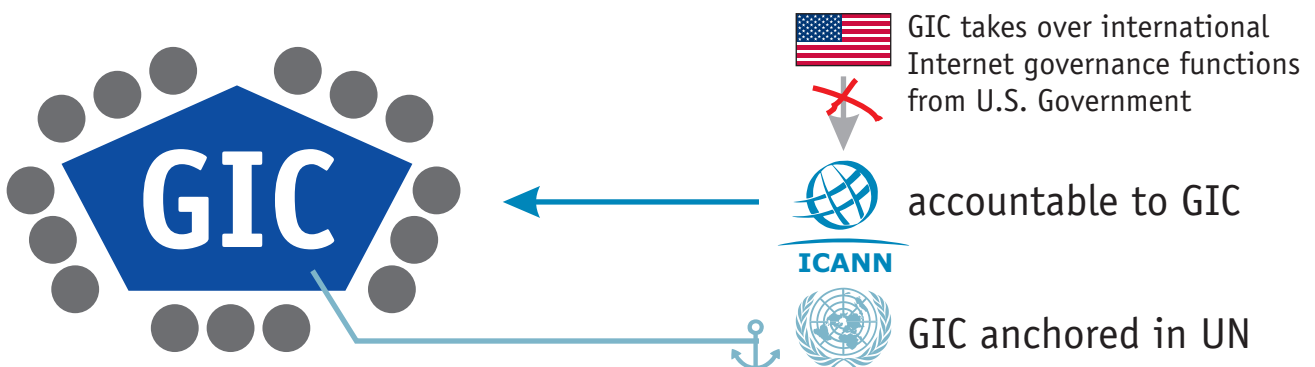

Forum:

A forum for dialogue complements all four organizational models

Model 1: Global Internet Council

Governments as members; private sector and civil society advising

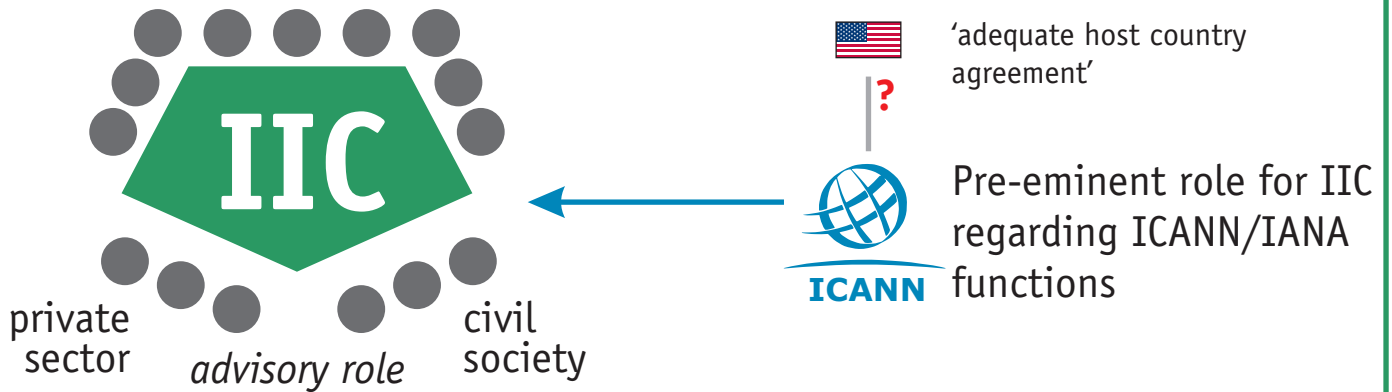

Model 2: No specific oversight organization

Possibly enhanced role for existing GAC

Model 3: International Internet Council

Governments: *leading role*

Model 4: Public policy and oversight separated

Government-led
Global Internet Policy Council
